

2026 Arizona Healthcare Workforce Goals and Metrics Assessment (AHWGMA)

ATTN: Arizona Healthcare Provider Network

The **2026 Arizona Healthcare Workforce Goals and Metrics Assessment (AHWGMA)** is a statewide effort designed to strengthen Arizona's healthcare delivery system by capturing real-time insights into **staffing capacity, workforce capability, and talent pipeline readiness** across the state. The data collected through the AHWGMA helps identify where organizations are experiencing skill gaps or capacity strain, anticipate future labor needs, and guide how workforce development resources and supports are prioritized to ensure providers have the right people, with the right skills, at the right time to meet member and community needs.

Participation in the AHWGMA is a contract requirement for organizations that fall under specific Provider Types. To determine whether your organization is required to participate, [Deliverables by Provider Type | AzAHP](#)

To support your organization through this process, we're excited to invite you to register for our upcoming **virtual webinars and live Q&A sessions**, where we'll walk through the survey, share tips, and answer questions.
