Preferred drug list

Introduction

Prescribers should use this Preferred Drug List (PDL) for patients with Rocky Mountain Health Plans a UnitedHealthcare Community Plan pharmacy benefits. The drugs in this PDL:

- Offer treatment options for patients who need a drug from that class.
- Have been reviewed and approved by the Pharmacy and Therapeutics (P&T) Committee.
- Have been selected to provide the most clinically appropriate and cost-effective medications for patients with Rocky Mountain Health Plans a UnitedHealthcare Community Plan drug benefits. Unlisted drugs need prior authorization (PA).

The PDL is up-to-date with current medical practice. This edition includes:

- New drugs on the PDL
- Updates to prescribing information based on changes in pharmacotherapy
- Updates based on comments and suggestions from providers

Notice

UnitedHealthcare Community Plan provides this PDL and its appendix for medical providers. We do not guarantee this information is accurate, and it is not comprehensive.

This PDL is not a replacement for a medical provider's knowledge and expertise of prescription drugs. We are not responsible for any medical provider's actions or omissions based on information in this booklet. Medical providers should refer to the drug manufacturer's product literature or standard references for more detailed information.

Preface

This PDL is organized by sections. Each section includes therapeutic groups by a drug class or disease state.

Products are listed by generic name with brand names as a reference. Unless exceptions are noted, all dosage strengths and forms of the drug are included in the PDL. Providers are encouraged to prescribe generics first.

This PDL covers select over-the-counter (OTC) products. Providers are encouraged to prescribe OTC medications when clinically appropriate.

Pharmacy and therapeutics (P&T) committee

The P&T Committee has doctors and pharmacists who are not with UnitedHealthcare Community Plan or its affiliates. It also includes some UnitedHealthcare Community Plan medical directors and pharmacists. Everyone on the P&T committee must follow the committee's ethics standards.

The P&T Committee meets 4 times a year and sends a newsletter to all participating doctors. All PDL decisions are also updated on the UnitedHealthcare Community Plan website every quarter.

A UnitedHealthcare Company

PCA-1-24-00868-Clinical-QRG_04092024

Covered outpatient prescription drugs

Medically necessary outpatient prescription drugs prescribed by a licensed prescriber are covered. Some items need prior authorization (PA). Eligibility for this benefit is based on the member's benefit plan.

Medical prescription drugs

Medical drugs are covered under the member's medical benefit.

Product selection criteria

The P&T Committee reviews clinical information on new drugs that are typically included in an outpatient pharmacy benefit. The review may include:

- Safety
- Efficacy
- Comparison studies
- Approved indications
- Adverse effects
- Contraindications/warnings/precautions
- Pharmacokinetics
- Patient administration/compliance considerations
- Medical outcome and pharmacoeconomic studies

When a new drug is considered for this PDL, it will be compared to similar drugs currently in the PDL. As part of this process, some drugs may be removed from a class. This is to make sure only the most clinically useful and cost-effective drugs are on the PDL.

All the information in the PDL is provided as a reference for drug selection. Prescribers can use this information to help them decide which drug to select for a patient.

PDL product descriptions

The PDL shows which strengths and dosage forms are covered. A drug may also have additional information or exceptions noted in the list. Use the examples below for reference.

Products covered include all strengths associated with the dosage form of the cited brand name product.

Extended-release and delayed-release products must have their own entry.

Dosage forms covered will be consistent with the category and use where listed.

As listed in the OTIC section, this is limited to the otic solution and suspension. From this entry, the ophthalmic solution and ointment, and the topical cream, cannot be assumed to be on the list unless there are entries for these products in the OPTHALMIC and DERMATOLOGY section of the PDL

When a strength or dosage form is specified, only the specified strength and dosage form is on the PDL. Other strengths/dosage forms of the reference product are not.

Drug tiers

The PDL has different tiers for drugs:

The drugs listed in the PDL have different tiers. The tiers are listed in the grid below.

Tier Name	Drug Tier
Tier 1	Generic
Tier 2	Brand

Generic substitution

This PDL requires generic substitution on most products when a generic equivalent is available. Generic substitution is when a pharmacy gives the generic drug instead of the brand name drug. The PDL indicates generic availability in the “Covered Drug” column.

If a brand name drug is medically necessary, prescribers can request a prior authorization (PA). The PA list does not include brand name items if a generic equivalent is covered. There are also many brand name products that are repackaged or distributed under a generic label. The generic label version should always be considered therapeutically equivalent and a substitute for the brand product.

The UnitedHealthcare Community Plan Maximum Allowable Cost (MAC) list sets a limit on the reimbursement price for certain prescription drugs. This price will typically cover most generics but not branded versions of the same drug. Products on the MAC list are commonly prescribed and dispensed and have usually gone through the Federal Drug Administration’s (FDA) review and approval process.

All FDA-approved generic substitutions since 1984, and many approved before 1984, show bioequivalence between the generic versions and the reference brand product. To gain FDA approval:

1. The generic drug must have the same active ingredient(s), strength and dosage form as the brand name product.
2. The FDA gave the generic an “A” rating and determined the generic is therapeutically equivalent to the reference brand. Ratings can be found in the FDA’s Approved Drug Products with Therapeutic Equivalence Evaluations (Orange Book).

When both criteria are met, a generic can be substituted with the full expectation that it will produce the same clinical effect and safety profile as the prescribed brand name product. Drugs that have a narrow therapeutic index (NTI) can also be guided by these principles.

Providers do not need to approach a therapeutic class (e.g., NTI drugs) differently from other classes when the FDA has determined a therapeutic equivalence. Also, providers do not need to do extra clinical tests or exams when substituting a therapeutically equivalent generic drug.

Drug efficacy study implementation (DESI) drugs

The FDA requires all drugs to be safe and effective to be on the market. Before 1962, the FDA did not check the effectiveness of each drug.

The DESI program was created to see how well drugs approved before 1962 work for their labeled indications. Most of these DESI products were classified as “fully effective” and are still available. Some products were classified as “less than fully effective” and are still under review. Many products that are the same, similar or related to DESI products are classified as DESI. “Less than fully effective” DESI products are not covered.

Plan exclusions

The following drug categories are not covered:

- DESI drugs
- Antiobesity agents
- Experimental / research drugs
- Cosmetic drugs
- Immunization agents
- Nutritional / diet supplements
- Blood and blood plasma products
- Agents used to promote fertility
- Agents used for erectile dysfunction
- Agents used for cosmetic hair growth
- Drugs from manufacturers that do not participate in the FFS Medicaid Drug Rebate Program
- Diagnostic products
- Medical supplies and DME except: syringes, needles, lancets, alcohol swabs, spacers, preferred diabetes test strips, 2 peak flow meters per year (Astech, Assess, Peak Air brands), 1 vaporizer every 3 years and 1 humidifier every 3 years

Days supply dispensing limitations

Plan members can get a one-month or up to three-month supply of certain drugs per prescription order or refill. Controlled substances can only be reordered or refilled when 90% of it has been used. Non-controlled substances can be reordered or refilled when 85% of it has been used.

If a claim is submitted before the 90%/85% threshold, it will reject with a “refill too soon” message.

Prior authorization of non-PDL medications

Drugs that aren't on the PDL require prior authorization (PA). Providers can send PA requests by mail or fax to:

UnitedHealthcare Community Plan
Pharmacy Services Department
2 Allegheny Center
Suite 600
Pittsburgh, PA 15212
Fax: 866-940-7328
Phone: **800-310-6826**

All PA requests should use the PA request form in the UnitedHealthcare Community Plan provider manual. Appropriate documentation must be provided to support the medical necessity of the non-PDL request. The UnitedHealthcare Pharmacy Department will respond to requests based on state law.

We ask that providers prescribe drugs that are on this PDL to patients covered by UnitedHealthcare Community Plan. If a pharmacist receives a prescription for a non-PDL drug, the pharmacist should ask the prescriber to change to a medication on this PDL. If a PDL alternative is not appropriate, the prescriber should ask us for a PA.

For questions about the PA process, providers can call the UnitedHealthcare Community Plan Pharmacy Prior Notification Service at **800-310-6826**. Members can call Rocky Mountain Health Plans Member Services at **800-346-4643**, TTY 711, 8 a.m. – 8 p.m., Monday – Friday.

3-day temporary supply overrides for non-PDL drugs

The pharmacy should talk to prescribers before filling a prescription for a non-PDL drug. If the prescriber is unavailable and the medication is needed immediately, the claim processing system will accept an override for one 3-day supply of the newly prescribed non-PDL drug. The pharmacy should submit a claim for the 3-day supply with a PA Type of 8 and PA number of "120". Depending on the members plan, a 3-day supply of non-preferred drugs may be available.

For assistance, pharmacies may call **800-310-6826**. If the prescriber thinks a non-PDL drug is medically necessary, they can request a PA.

Quantity limitations (QL)

Prescriptions for more than the dosage limit need prior authorization (PA).

Quantity limits based on efficient medication dosing

The Efficient Medication Dosing Program consolidates medication dosage to the most efficient daily quantity. This helps patients follow their drug therapy and lowers health care costs.

The limits for this program are based on FDA approval for dosing and the availability of the total daily dose in the least amount of tablets or capsules. The prescription claims processing system will automatically apply the right quantity limit to a drug. If necessary, the system will also tell the pharmacist to ask the prescriber for a new prescription.

We will let providers know about any changes to the program. Providers can request a medical exception for a patient through the PA process. For questions, providers can call UnitedHealthcare Community Plan Pharmacy Prior Notification Services at **800-310-6826**.

Controlled substances

You may fill 4 medications from the following classes in a 30-day period:

- benzodiazepines
- sedative hypnotic agents
- barbiturates
- select muscle relaxants

PA is required for additional fills. Medications in these classes may have quantity limits.

Specialty pharmaceutical management program

Drugs on the PDL that are part of the Specialty Pharmaceutical Management Program are labeled with an "SP" in this booklet. This program helps us provide high-quality, cost effective care for our members. For example, certain injectable drugs that are unavailable through the retail pharmacy network are available through this program after PA.

To get PA, a provider must request electronic PA or fax a PA form to the UnitedHealthcare Community Plan Pharmacy Department at 866-940-7328. The Pharmacy Department will review and respond to all requests. Once the request is approved, we'll deliver the product to the member or provider.

To get an electronic PA, submit the request through CoverMyMeds or SureScripts at <https://professionals.optumrx.com/prior-authorization.html>

To request a PA form, call the UnitedHealthcare Community Plan Pharmacy Department at **800-310-6826**.

Step therapy (ST)

PDL suggestions

Providers can send PDL suggestions to our Director of Pharmacy Services at:

Attn: Director of Pharmacy Services
 UnitedHealthcare Community Plan
 2 Allegheny Center
 Suite 600
 Pittsburgh, PA 15212
 Fax: 1-866-940-7328

PDL suggestions must include appropriate documentation, such as clinical studies from medical literature. This literature should include information showing clinical necessity and therapeutic advantages over current PDL products. Suggestions with appropriate documentation will be reviewed by the P&T Committee at the next committee meeting.

Editor

We encourage you to send us any comments and suggestions for this PDL. Your input is important to us and helps us make sure this PDL is a continued success. All comments will be reviewed and considered. Please send your comments to:
