

Rehabilitation Therapy Services

Historically, Louisiana Medicaid MCOs were able to contract with individual rehabilitation therapists and therapy groups, but the Louisiana Department of Health (FFS Medicaid), could not.

With this update to Informational Bulletin 18-5, LDH can now contract with these providers to service their FFS enrollees. Please see below contact information.

Speech therapy, physical therapy and occupational therapy services can be provided to Medicaid beneficiaries of any age and without restrictions to place of service.

Therapists enrolled with Louisiana Medicaid as Early Steps providers may continue to provide services to the Early Steps recipients through FFS Medicaid only. UHC does not cover Early Steps services.
