

# EC7810 Capitation Detail File format change

## Quick reference guide

**Effective July 1, 2026**, we've changed format of the field in the table below to match how it appears in the revised Monthly Membership Report from CMS.

Code type	Field description	Field length	Format
RISK_ADJUSTED_FACTOR_SCORE	Risk adjustment factor	Possible 8 characters, with a decimal length of 4 digits	000.0000

The field has been updated in the following reports:

- **EC7810 File Layout with Excel Headers** – Identifies and defines code types used for reporting
  - Go to UnitedHealthcare Provider Portal > **Report Center**
    - Select the EC Capitation Report resources dropdown
- **EC7810 file** – Includes data specific to your clinic. The report is securely stored in **UHCprovider.com** and requires a log in for access.
  - From any page on **UHCprovider.com**, select Sign In and enter your One Healthcare ID
    - If you don't have a One Healthcare ID, **register now**
