

UnitedHealth Premium Premium Care designation

Additional UnitedHealth Premium® methodology documents are located on unitedhealthpremium.uhc.com.

Overview

UnitedHealth Premium designates physicians as Premium Care who:

- Meet the effective quality care and efficient quality care criteria; or
- Meet effective quality care criteria but do not have enough measures attributed to evaluate efficient quality care

Physicians meet the effective quality care criteria when their score is 50 or higher.

Physicians meet the efficient quality care criteria when their score is 25 or higher.

Physicians who do not have enough measures attributed for evaluation may receive scores and a rating based on an affiliated medical group's performance for their Premium specialty in the same geographic area. Physicians without enough measures attributed for evaluation and who are not affiliated with a medical group that meets the effective and efficient quality care criteria may still be designated Premium Care if they met the criteria for the previous version, provided their current and previous version Premium specialty is the same.

Designation display

Premium Care physicians are identified in our commercial provider directories with the following icon and description. All other physicians have no designation display.

♥♥ Premium Care Physician

This physician meets the UnitedHealth Premium quality care criteria which includes safe, timely, effective and efficient care.

Important notes about UnitedHealth Premium

The information from UnitedHealth Premium is not an endorsement of a particular physician or health care professional's suitability for the health care needs of any member. UnitedHealthcare does not practice medicine nor provide health care services. Physicians are solely responsible for medical judgments and treatments.

A Premium Care Physician designation does not guarantee the quality or the outcome of any health care services members receive. The fact that a physician does not have a Premium Care Physician designation does not mean the physician does not provide quality health care services.

All physicians in the UnitedHealthcare Network have met certain minimum credentialing requirements. Regardless of whether a physician has received a Premium Care Physician designation, members have access to all physicians in the UnitedHealthcare Network as described in the member's benefit plan.

There are various reasons why a physician may not be designated as a Premium Care Physician. A physician may not receive a designation because that physician has not been evaluated. This occurs when a physician does not practice in a specialty or market that is evaluated by Premium, or the physician's evaluation is in process. This also occurs when there are not enough measures, patients, and or episodes attributed to the physician for evaluation. This is not an indicator of the total number of patients treated by the physician, or the number of procedures performed by the physician.

UnitedHealthcare informs members that designations are intended only as a guide when choosing a physician and should not be the sole factor in selecting a physician. Members are encouraged to discuss designations with a physician before choosing them or consult with their current physician(s) for advice on selecting other physicians.

As with all programs that evaluate performance based on evaluation of a sample, there is a risk of error.

There is a risk of error in the claims data used and in the way patient care is attributed to physicians. UnitedHealth Premium uses statistical testing to compare a physician's performance to benchmarks. There is a risk of error in statistical tests when applied to the data and a result based on statistical testing is not a guarantee of correct inference or classification. Physicians have the opportunity to review the data and evaluation results and may submit requests for changes and or corrections.

The information contained in this document is subject to change.
