

# Medication Sourcing Protocol - Requirements to use a participating specialty pharmacy for certain medications

For UnitedHealthcare commercial plan members

To support the provider/patient relationship, participating outpatient providers are required to obtain certain drugs from indicated specialty pharmacies unless otherwise authorized by UnitedHealthcare. The tables below include drugs that require sourcing for all outpatient places of service and/or drugs only requiring sourcing administered in the outpatient hospital setting. When one of these medications is appropriately obtained through the indicated specialty pharmacy, the specialty pharmacy will bill UnitedHealthcare directly for the drug under the member's medical benefit. Outpatient providers may only seek reimbursement for administering the medication. Outpatient providers may not bill the member for the medication.

Outpatient providers can contact their Network Contractor with any questions regarding the various contracts/fee schedules for each drug listed below.

This protocol works in conjunction with all UnitedHealthcare policies and protocols and does not replace or supersede them.

**Please note:** The specialty pharmacy protocol is subject to applicable state laws and regulations and does not apply to UnitedHealthcare West, UMR, Student Resources, UnitedHealthOne and Sierra plan members.

## Medication Sourcing Protocol – All Outpatient Providers

**Places of service:** Outpatient hospital, physician office, home, ambulatory infusion

The protocol for the drugs listed in the table below does not apply to Maryland or some commercial plan members in Louisiana.

**Disclaimer:** Inclusion in this list does not indicate a drug is covered by a particular plan. Any drug may be subject to other requirements, including but not limited to Review at Launch and/or Medical Benefit Therapeutic Equivalent Medications – Drug Exclusion.

Medication name	Therapeutic class	Code	Specialty pharmacy

### Medication Sourcing Protocol – Outpatient Hospital Only

The national ancillary network infusion provider column in the table below includes some, but not all, home and/or ambulatory infusion providers that may be used for alternate site of care treatment locations, if appropriate. Providers may use national and regional UnitedHealthcare contracted infusion providers not included in the provided list.

The specialty and pharmacy list below does not apply in the following states/territories: Alaska, Kentucky, Maryland and Rhode Island. The protocol does not apply for some commercial plan members in Louisiana.
